Skill India: Responding to Change

Dr Amanda Day

Counsellor, Education and Research

Australian High Commission, New Delhi

Setting the Skill India Agenda

India's Skills Mission is to create an ecosystem of empowerment by skills on a large **scale at speed** with **high standards** and achieved **sustainably**.

Challenge for India is to skill for **global employability** and **quality** as **workplaces transform** and **globalisation** and **digital technologies** drive **change**.

Responding to Challenges & Change

- Policy alignment
- Demographic dividend
- Changing perceptions
- Global labour force needs
- Career planning and being part of a global generation
- Rapidly changing workplaces requires flexibility, resilience, different capabilities and competencies, leadership

Australian Collaboration

Government to Government

Promoting high value diplomatic and economic outcomes

Standards and benchmarks

Building India's ecosystem to align with international standards and benchmarks

Provider to Provider

Promoting quality frameworks, TVET systems and products that generate new opportunities for training providers and industry to collaborate

Industry and Partnerships

Improving access to skilled labour for Australia, India and multi-national companies to improve productivity and expand opportunities for growth

Collaboration is Key

- Partnership approach between India and Australia is mutually beneficial
- Responding together to the evolving global labour market
- Understanding transitioning economies and transforming jobs
- Skill development is critical to both nations and collaboration is mutually beneficial
